
POLICY AMENDMENT FORM

Amendment to Agriculture Infrastructure
(Policy Title)

Section Number /Title to Be Amended New Sec. 10.5

Subject of Amendment Global Positioning System (GPS)

Submitted By Commissioner Steve Troxler North Carolina

Amendment Text :

Insert a new section 10.5 Global Positioning System

The National Differential Global Positioning System (NDGPS) program is a valuable asset in anticipating and responding to natural, infrastructure and intentional disasters, and making major contributions to weather predicting, rescue and recovery, and agriculture. NASDA supports the completion of the terrestrial component of the NDGPS.

BACKGROUND: The Research and Innovative Technology Administration of the Department of Transportation is assessing the current user needs and systems requirements of the inland (terrestrial) component of NDGPS. This assessment is in preparation for making a recommendation to the National Space-Based Positioning, Navigation and Timing Executive Committee on the need to continue to operate the inland component of the NDGPS system, and to make a decision on funding the NDGPS.
