

June 8<sup>th</sup>, 2022

We are writing to express our strong support for H.R.7266, a bill to amend the Federal Insecticide, Fungicide, and Rodenticide Act to prohibit the local regulation of pesticide use, introduced by Representative Rodney Davis. We support science-based regulations, and H.R. 7266 ensures that oversight of pesticides is based on scientific expertise at the state and federal level.

H.R. 7266 ensures uniform protection of the public's health, food supply, and property from pests by stating that oversight of pest control is best handled jointly by the lead agency in each state and the U.S. Environmental Protection Agency (EPA) - the entities that have the technical expertise and resources to best evaluate a product.

**On behalf of the organizations signed below, please consider supporting H.R. 7266 to protect Americans in the places where they live, work and play.**

We strongly believe that the EPA and the state lead agency should be the only regulatory entities responsible for the registration, sale, and use of pest control products. H.R. 7266 clarifies the exclusive role of state lead agencies, preventing localities from imposing a patchwork of conflicting regulatory restrictions without scientific assessment, economic analysis, consideration of the rights of property owners to control pests, or responsibility of public health agencies to control disease vectors.

If passed, the bill reinforces the intention of FIFRA that only the state lead agency act as a coregulator in the state with EPA, ensuring that the highly technical work of determining how pest control products and services are used is made by those with technical knowledge. In states with preemption, the state lead agency already works with the EPA on any and all pesticide usage, sale, or distribution. The handful of states without a pesticide preemption law allow individual localities to regulate pesticides differently, creating unequal protection for citizens based on their zip code.

H.R. 7266 would ensure that no matter where an individual or business is within a state that they are guaranteed equal protection from the diseases, insects, weeds, and other pests that cause significant negative environmental, economic, and health impacts. Please consider supporting H.R. 7266 today.

Sincerely,
