Instructions for Reporting Agricultural Workers

- Agricultural workers are workers directly hired and paid by the farm operation to perform work on a farm or ranch in connection with the production of agricultural products.
- Include part-time workers, paid family members, hired managers, and workers on paid leave.
- Do not include workers hired through a contractor, custom workers (workers hired to use their machines to perform a service on the farm e.g., combining, fertilizing), retail workers, or value added workers (workers who materially alter the form of the product produced e.g., winery, dairy manufacturing plant workers).
- Report workers under the worker code (provided on page 5) in which they are working, not under the worker code for which they have been trained.
- If the worker performs work in two or more worker codes, report them under the worker code that requires the highest level of skill. If there is no measurable difference in skill requirements, report workers under the worker code in which they spend the most time.
