

National Association of State Departments of Agriculture

Subject of Policy Amendment 12:

Controlled Environment Agriculture

Section Number or Title to be Amended:

New Section 10.7, Controlled Environment Agriculture

Submitted by:

Sec. Russell Redding (PA)

Text of Policy Amendment:

10.7 Controlled Environment Agriculture

Controlled environment agriculture (CEA) represents a diverse group of indoor agricultural production methods that utilize innovative technologies including, but not limited to, hydroponics, aeroponics, and aquaponics to grow a wide variety of specialty crops. These operations occur indoors or under glass with systems that ensure optimal growing conditions.

- NASDA supports federal investment for infrastructure costs associated with controlled environment agriculture through tax credits, grants, etc.
