

NASDA Survey Training

April Citrus Survey (CITRUS PROD)

**United States Department of Agriculture
National Agricultural Statistics Service**

NOD-Training Group
March 2022

General Survey Information

- Conducted in AZ, CA, & TX
- Project Code: **133-Citrus Fruit Survey**
- Questionnaires:
 - Mailed out around March 24th
 - Web reporting option available
- Release:
 - *Crop Production*
 - April 8, 12 noon EST

Survey Information

- Looking for 2021 – 2022 season *expected* production of Lemons, Oranges, and Grapefruit
 - Depending on state
- At this point, we're not asking about end use
 - Just expected production...regardless of if the fruit will be used for fresh market, processing, etc
- Like with most fruits and vegetables:
 - A wide variety of units may be reported
 - Sometimes with varying weights
 - Questionnaire is set up to handle whatever is reported

Screening Questions

- Any acres in **2021 – 2022** of:
 - Oranges, Lemons, Mandarins, Mandarin hybrids, Grapefruit, or Pummelos?
 - If **“NO”**, Will this operation plant any of these citrus fruits in the future?
 - Yes/No/DK: all route you to the end of the survey
- Additional screening for each type of Citrus
 - Does this operation have any [specific type of citrus] acres?
 - If **“NO”**, Will this operation have any [specific type of citrus] acres in the future?
 - Yes/No/DK: all route you to the next citrus crop

Survey Questions

- **Total acres** of [specific fruit] on April 1
 - Of these, how many are **bearing age** this year
 - Even if no *production* this year (due to freeze, disease, etc), still record the *bearing age* acres
- Expected **total production** for 2021 – 2022 season
 - Quantity, unit, pounds per unit

Arizona

- **Lemons:**

- Will ask for total acres, bearing acres, and expected total production

- **Valencia Oranges, Navel and other Non-Valencia Oranges, Mandarins and Mandarin Hybrids, and Grapefruit and Pummelos:**

- Will only ask for acres on this operation on April 1

Texas

- **Valencia Oranges, Navel and Other Non-Valencia Oranges, Grapefruit and Pummelos:**
 - Will ask for total acres, bearing acres, and expected total production
- **Mandarins and Mandarin Hybrids, and Lemons:**
 - Will only ask for acres on this operation on April 1

California

- **Valencia Oranges, Navel and other Non-Valencia Oranges, Mandarins and Mandarin Hybrids, Lemons, Grapefruit and Pummelos:**
 - Will ask for total acres, bearing acres, and expected total production for all five types of citrus crops

No Citrus and/or Out of Business

- Screening doesn't thoroughly cover this
- **Leave good notes** if the operation has no citrus acres or is completely out of business (no agricultural activity)
 - What happened? New operator? Any other info?

Things to Watch Out For

- Current total and/or bearing acres differs from previous
- Bearing acres cannot be greater than total acres
- Low bearing to total acres ratio
 - We are asking about *bearing age*....and not what will actually bear a crop this year
 - This can cause some confusion if there is a late frost, disease/insect issues, etc. that impact production
- **Bearing acres reported but no production reported**
 - Can be possible: crop was lost to a late freeze, etc.
- Yield seems high or low

Things to remember

- Referring to 2021 - 2022 crop year expected production
- Watch the decimal points: acres, pounds per unit
- Remember, *bearing age*
 - Even in cases of limited or no production this year

Special Request for OoB Records

- **2022 Census of Agriculture**
 - Mails out this December
 - **We need to contact every operation that was in business for any part of 2022**
 - If an operation is **Out of Business**
 - **Please ask if they were in business at any time during 2022 and leave a note**
 - We can update the record to still be mailed the Census form

Conclusion

- Encounter anything odd or unexpected leave a note
- Practice on your iPad
- Contact your supervisor or RFO with any questions
- Have a Great Survey!

Citrus Fun Facts

- **Lemons** turn from green to yellow because of temperature changes, not ripeness, so green patches are OK, but avoid brown spots, because that means rotting
- Christopher Columbus brought **citrus** seeds with him to the Americas in 1493, introducing the fruit there
- Around 85% of all **oranges** produced are used for juice
- A single **grapefruit** tree can produce over 1,500 pounds of fruit each year.
