Purpose of Surveys

- **Why have Agricultural Surveys in General?**
 - NASS is responsible for preparing County, State and National crop and livestock estimates for the USDA.
 - Agricultural Surveys obtain data from farmers and ranchers all over the Nation.
 - These surveys provide the basis for estimates of this season's crop production and supplies of grain in storage.
 - Survey results also provide the foundation for setting livestock and poultry inventory numbers.

Purpose of Surveys (Continued)

- **Why have Agricultural Surveys in General?**
 - Estimates derived from these surveys supply basic information needed by farmers to make decisions for both short-term and long-range planning. These estimates might influence a farmer to:
 - Increase or reduce production.
 - Place more or fewer cattle on feed.
 - Expand or build a new facility or acquire more land.
 - Plant or harvest a particular crop.
 - Hold or sell crops now in storage, etc.

Who Uses This Data?

- Farmers and ranchers:
 - Make decisions about what and how much to grow or raise.
 - Develop marketing plans and determine best time to sell stored crops.
- Agribusinesses/Processors:
 - Help food processing plants, farm input companies, and other businesses decide where to locate their operations so they're close to areas of heavy production.
 - Serve producers more cost-effectively.

Who Uses This Data? (continued)

- Government agencies:
 - Determine key legislative decisions for the industry.
 - Plan and administer Federal and State programs in areas such as consumer protection, conservation, foreign trade, education, and recreation.
- Media:
 - Create context for news stories.
 - Inform readers and promote industry issues.

Where are the Data?

NASS publishes nearly 500 agriculture statistical reports each year.
PLUS many other publications at the individual state level.

Screening Form

- A tract will be an agricultural tract if anywhere on the total acres operated, the operation:
 - Produces or raises an agricultural commodity
 - Stores crops
 - Produces and Sells agricultural products
 - Receives government payments (CRP, WRP, etc.)
 - Owns or Raises livestock
 - Meets another criteria of a farm
- A tract will be a non-ag tract if it meets none of the criteria above.
- When in doubt? Fill it out.

Screening Form

Special Notes About Non-Ag Tracts:

- In the Operation Name, record what the tract is
 - church, woods, roads etc.
- Record a contact name and full street address if possible
 - This is NECESSARY for any Non-Ag Tracts with potential for Ag in the next year.
 - For residential neighborhoods with no ag, one contact name is sufficient to represent a groups of houses IF it follows the ½ acre rule.

Screening Form

Special Notes About Non-Ag Tracts:

- In Column 20, seriously consider “potential for ag”
 - Could a crop be seeded without having to improve or clear the land?
 - Is there a greenhouse or grain storage bin on the property?
 - Is there a fenced pasture, barn, pen, hog building, chicken house, or any other sign of potential for livestock?

Screening Form

Special Notes About Non-Ag Tracts:

- In Column 20, seriously consider “potential for ag”
 - Ask Respondent if they intend to have agriculture in the next year.
 - If no Respondent is available, use your best judgment based on observation.
 - Non-Ag Tracts coded to have a potential for agriculture WILL be sampled for all follow-on surveys.

Screening Form

Other Potential Screening Problems:

- Federal Public Land (Forest Service)
- Non-Federal Public Land
- Industrial Land
- Institutional Farms
- Ag Business
- Equine Operations
- Land used “rent free” by someone other than the tract operator
- Out-of-state operations
- Operator with land in more than one segment
- Landlord rents out cropland, but keeps control of other facilities
- Two or more renters of the same parcel
- (Consult Chapter 5 of the Interviewer Manual for more information)

Screening Form

Other Potential Screening Problems:

- Two or more aerial photos for a segment
- Boundaries of segment not identifiable
- Boundaries of segment on aerial photo and county map do not agree
- Aerial photos not provided for a segment
- Segment boundaries extend into a neighboring state/county
- Segment boundary cuts through a field
- More than 20 ag tracts in one segment
- Incorrect Digitized Acres

Section D - Crops and Land Use on Tract

The Heart of June Area

Section D - What's it for?

- Section D collects detailed information on ALL ACREAGE inside the **BLUE TRACT** boundaries!
 - Not just tillable or cropland acres.
 - Be sure to account for all of the cropland, woods, farmsteads, pasture and waste.
- Extra time reviewing the parcel maps with the respondent while screening for agriculture means a more accurate job interviewing and less time spent completing the questionnaire.

Section D – Crops and Land use on Tract

1. The map and photo has a red boundary drawn on it. How many acres did you operate inside that red boundary on June 1?

Acres
840
.

The next questions will ask about the land use for the acres that you operate inside the red boundary on June 1. **Do not include land you operate that is OUTSIDE the red boundary.**

It is very important that you do not include any acres beyond the red boundaries of the segment. This is critical for this section! Confirm with tract operator once more before you conclude the phone interview.

Section D – Format Change

No longer need
field level data!!

SECTION D - CROPS AND LAND USE ON TRACT

SECTION D

IMPORTANT NOTES

- Section D must be completed for every Ag Tract Questionnaire!!!
- For Refusals and Inaccessibles you will still need to draw the tracts boundaries on the aerial photo and complete Section D to the best of your ability.
 - Use your grid to determine tract acreages.
 - Use all other resource materials offered to you.
 - What did you observe when you drove around the segment?

Let's look at a few tracts

- You have drawn off the **tract boundaries** for Tracts A, B, C and D in the Segment.
- You have completed Section D in the questionnaire for each of these tracts.

Section H

Total Cattle and Calves

- Item 5 asks for the number of cows and heifers on the total acres operated that are expected to calve during the period June 1 through December 31
 - The majority of beef operations calve in the spring but there are some instances when an operation calves in the fall.
 - Dairy operations will generally calve year round but you may have to probe to get the number of calves born.

Section H

Total Cattle and Calves

- Item 6 asks about calves born during the period January 1 through May 31
 - 6a. How many were on hand June 1?
Typically, these should have been reported in Item 2f
 - 6b. How many were sold, moved off or slaughtered before June 1?
 - 6c. How many died before June 1?
Exclude calves born dead
 - Item 7 is the sum of items 6a – 6c
Or the total number of calves born January 1 through May 31

Section H

Total Cattle and Calves

- Data Relationships to Consider:
 - If the operation has beef cows or milk cows, there should be a calf crop accounted for in question 6.
 - Operators who do not breed cattle should probably not be reporting “cows”.
 - Calves on hand June 1 in question 6 should be consistent with calves reported in question 2.
 - The total calf crop for the entire year (questions 5 and 7 combined) should be close to the number of cows in question 2.
