

National Association of State Departments of Agriculture

Subject of Policy Amendment 7:

Global Market Access

Section Number or Title to be Amended:

10. Agriculture Infrastructure

Submitted by:

Commissioner Mike Strain, DVM (Louisiana)

Text of Policy Amendment:

Farmers and ranchers depend on reliable infrastructure to deliver their products and expand their operations. Out-of-date, underfunded transportation systems and a lack of available labor hinder agriculture production, while advancing technology encourages growth. NASDA believes in maintaining fairness and equity within the agriculture community through the development of a strong agriculture infrastructure, including export grain elevators for increasing access to the global market.
