

# Oilseed AP

## Survey Information Sheet

### Survey Overview:

Looking at oilseed acres planted, acres harvested, prices received (for specific crops) yield and production. Contacting all known operations with either canola, flaxseed, mustard seed, rapeseed, safflower, or sunflower. The January Annual Crop Production report contains estimates of Oilseed acres planted, acres harvested, yield and production. The Oilseeds program consists of one end-of-season survey conducted in December

### Things to Watch Out For:

- Low harvested to planted ratio
- High or low prices and yields
- Quantity sold greater than total production
- 90% of CA sunflower production is for hybrid seed and should be reported under “oil”
- Sunflowers grown for confection use or bird seed are to be reported under “non-oil”

Quantity Sold & Price **NOT** asked in all states.

## Oilseed Production (2021)

	Harvested Acres	Yield/Ac.	Price per Unit
<b>Canola</b>	2,089,000	1,302 <u>lbs</u>	\$32.00/cwt
<b>Flaxseed</b>	268,000	10.1 <u>bu</u>	\$27.00/ <u>bu</u>
<b>Mustard Seed</b>	89,300	491 <u>lbs</u>	\$30.70/cwt
<b>Rapeseed</b>	12,500	1,809 <u>lbs</u>	\$18.60/cwt
<b>Safflower</b>	135,000	1,001 <u>lbs</u>	\$25.50/cwt
<b>Sunflower (all)</b>	1,243,800	1,530 <u>lbs</u>	\$31.70/cwt
