

# Potato Processing Inquiry Survey Information Sheet

## Overview:

- Remember we are asking about the final numbers for the 2022 crop. **NOT** 2023 forecast. (because of storage and marketing procedures)
- Total hundredweight grown raw and processed at their plant
- 2022 potato crop was utilized by processors for:
  - Potato Chips
  - Frozen Potatoes
  - Canned Potatoes and Products
  - Dehydrated Potatoes
  - Other Potatoes
- 2022 purchased or received potatoes that were NOT processed for:
  - Fresh Market
  - Transferred/Sold to other processing plants
  - Other Dispositions
    - Sold for Seed
    - Sold for Livestock Feed
    - Shrink
    - Dumped
    - Other Use
      - Will need to specify other use

## Things to Remember:

- The bulk of all potatoes should be for processing, followed by fresh market, then a much smaller proportion in seed stock, with livestock feed being a very small percentage.
  - If respondents are reporting mostly seed or feed potatoes, ask questions to confirm, and leave a note on the record.
- Total processed should equal the sum of potatoes processed
- We are asking for TOTAL crop not just a portion of the processed crop
- Weights should be reported in hundredweight NOT tons
  - If they report in tons make a note explaining the situation
