

## 2023 August On Farm Rice Stocks Survey

- Project code: **129** – Rice Stocks Survey
- Questionnaires:
  - Mailed around July 21
  - Web reporting available
- Sample:
  - Follow-On from June APS, subset of farms with suspected rice stocks and/or positive rice acres
- Release:
  - *Rice Stocks*
  - August 13, 12pm ET

### General Survey Info:

“On Farm” stocks = contacting farmers rather than businesses, such as Riceland. Information is combined with the Off-Farm Grain Stocks survey to produce one report.

Survey: This is a short survey just looking to collect information on On-Farm rice stocks. There is just one questions to the survey:

1. How much rice is on hand from the 2022 and earlier crop years, as of August 1, 2023?
  - a. Long
  - b. Medium
  - c. Short

If the respondent has any comments, leave them in a note on the record.

### Watch for:

Out of business operations. Being that this is a follow-on from June there shouldn't be many of these cases. Leave good notes about current status.

Do not want 2023 new crop rice reported. We only want 2022 and earlier crop years.

Off Farm rice stocks reported. Make sure rice stocks are “on the acres operated”

Unusual units. Be sure to record the unit and weight of the unit if it's something other than lbs, tons, or CWT.
