

National Association of State Departments of Agriculture

Subject of Action Item E:

Labeling of Human Food Products Derived from Cultured Cells of Livestock, Poultry, and Seafood

Submitted by:

Secretary Hunter Roberts, South Dakota

Corresponding Policy Section and Statement:

11.13 Labeling and Market Claims

Text of Action Item:

- NASDA urges federal discussions and the establishment of regulatory frameworks for distinguished labeling of human food products derived from cultured cells of livestock, poultry, and seafood (cell-based products).
- NASDA encourages USDA, FSIS, and FDA to thoroughly analyze the cellular properties as well as nutritional properties of these products and adjust labels to accurately reflect differences between cell-based products and conventionally raised meat.
- NASDA will engage USDA, FSIS, FDA, and other entities to advocate for cell-based meat, poultry, and seafood labeling requirements that enhance consumer awareness of the products' cell-cultured origins enabling the consumer to make informed purchasing decisions.
