2023 Fruit Chemical Use Survey Respondent Booklet

Every other year, the U.S. Department of Agriculture (USDA) conducts the Fruit Chemical Use Survey. The survey gathers information on chemical use for your crops as well as pest management practices for different commodities.

A representative from the National Association of State Departments of Agriculture (NASDA) will work with you to complete your survey by telephone. During the telephone interview, our representative will ask you detailed questions about the types of pesticides you use on your crops. To make the interview faster, please have your spray records available. If you used a commercial chemical company, please help our NASDA representative by giving them your consent to contact the commercial sprayer to collect these data.

This booklet will help you and our representative find and record the correct pesticide products. It lists registered label names of products, along with their Environmental Protection Agency registration number. If you do not find the correct product listed in this booklet, record where the product was purchased or as much information about the product as possible.

Your participation is important. By responding to this survey, you are helping USDA to compile an accurate picture of farming in the United States. This will help to ensure that the national and local decisions that impact the well-being of your farm and the industry are based on accurate and timely information.

Your survey response is confidential. The information you provide will be used for statistical purposes only. In accordance with federal law, your responses will be kept confidential and will not be disclosed in identifiable form.

Thank you for your participation and support of our programs and U.S. agriculture. If you have any questions, please contact us at 888-424-7828, or visit www.nass.usda.gov/go/chemuse/.

Sincerely,

Joseph L. Parsons
Chair, Agricultural Statistics Board

Enclosure

According to the Paperwork Reduction Act of 1995, an agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB number is 0535-0218. The time required to complete this information collection is estimated to average 45 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.
