Indiana Popcorn EPA - Information Sheet

Project code

- 933

Start/stop date

- November 27-December 18

Background info

- The project maintains a popcorn estimation program conducted independently by NASS for the benefit of Purdue University. These estimates have been provided since 2013.

Things to note

- Questions 4 & 5 can be reported in either total production **OR** yield per acre. This is usually reported in hundredweight (CWT). If it is reported in a different unit, please leave a comment.
- Question 6 quantity sold can either be reported in average price per unit **OR** total dollars received.
- If the reporter does not know all the contact information of the contractor, just the name of the contractor the popcorn was sold is fine.
- Please leave any comments about unusual situations such as weather events that affected production and price of the crop.
